

Thematic plan of practical classes
5th year students of the Faculty of Dentistry
in 2016 - 2017 academic year

№	Topic	Hours
1.	Topic 1. object and purpose of clinical pharmacology. The main provisions of the pharmacokinetics and pharmacodynamics. Theme 2. Interaction of drugs, complications of therapy. Curation.	5
2.	Theme 3. Clinical and pharmacological characteristics antihypertensive and antianginal drugs Theme 4. Clinical and pharmacological characteristics of drugs that affect blood clotting	5
3.	Topic 5. Clinical and pharmacological characteristics of local anesthetics Topic 6. Clinical and pharmacological characteristics of antimicrobial drugs.	5
4.	Theme 7. Clinical and pharmacological characteristics of drugs that affect bronchial patency. Anti-inflammatory and anti-allergic drugs. The final module control.	5
Total:		20 h

Individual tasks
5th year students of the Faculty of Dentistry
in 2016 - 2017 academic year

1. Clinical pharmacology cardiotonics (glycoside and nehlikozydnoho origin)
2. Clinical pharmacology of antiarrhythmic drugs
3. Clinical and pharmacological characteristics of drugs that affect the function of the digestive tract
4. Clinical and pharmacological characteristics of drugs affecting bone metabolism and mineralization of enamel
5. Clinical and pharmacological characteristics of drugs for general anesthesia
6. Clinical and pharmacological characteristics of local antiseptics
7. Clinical and pharmacological characterization of antiviral drugs
8. Clinical and pharmacological characterization of antifungal drugs
9. Clinical and pharmacological characteristics vitamins
10. Clinical and pharmacological characteristics of sedative drugs
